Chapter 16

A sinoo na inu – The frame of the house

Enoch Horai Magum

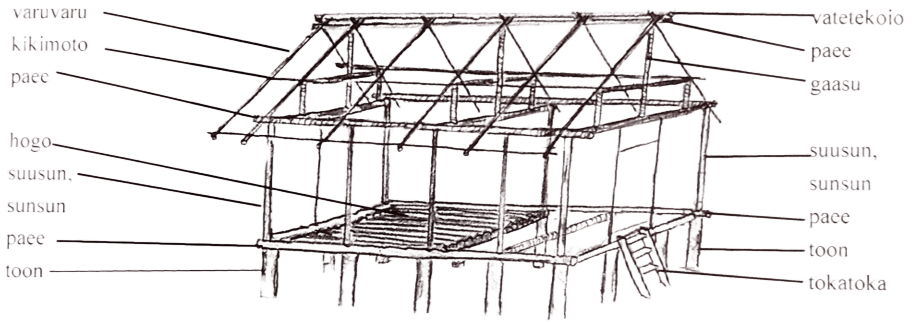

Figure 1: *A sinoo na inu* – The timber frame (lit. 'skeleton') of the house

(1)	*Amaa humhum na inu gorogoroho vaa Teapu*	Some parts of the Teop sleeping house
(2)	***Toon***	**Post**
(3)	*A ta naono vai a ta beera, bebeahu ae kikis to toon riori bona inu,*	A big, long and strong pole that is used as a post of the house,
(4)	*ge eve o naono to dee maana bona inu.*	or, (put differently,) it is a pole that carries the house.
(5)	*Bea ta tovihi, na tei koana tea beera na inu.*	How many, that depends on the size of the house.

Enoch Horai Magum. 2026. *A sinoo na inu* – the frame of the house. In Ulrike Mosel (ed.), *The material culture of the Teop people of Bougainville*, 139–142. Berlin: Language Science Press. DOI: 10.5281/zenodo.22880258

(6)	*Evehee sa gonogono vahogo haari,*	But they do not get them in a careless way,
(7)	*ahiki, o naono to mataa ki nana bono toon o toraha.*	no, the tree that is good for a post is the New Guinea Teak.
(8)	*O naono o kikis ae o vaanagu koava.*	The wood is strong and resistant to rotting.
(9)	***Paee***	**Horizontal beam** (joist, tie beam, and the main ridge pole)
(10)	*O naono o bebeahu to vaobete riori toon na maa paos.*	The long beam that is put on top of the posts.
(11)	*Evehee toro naono vai haabana o kikis, tabae eve to kahi dee nana bono paranda.*	But it must again be a strong beam, because it will carry the floor.
(12)	*A ta tovihi? Na tei koana tea bero tea toon.*	How many? That depends on the number of the posts.
(13)	*O hum to teitei bata nae mee, ei toon na maa sunsun.*	A place where they also lie, this is on top of the posts called *sunsun* (the standing posts).
(14)	***Sunsun, suusun***	**Standing post**
(15)	*O sunsun o naono to sun nana toon na maa paee.*	The standing post is a pole that stands on the horizontal beams.
(16)	*O meho paee repaa obete taono vaha ni maa bona,*	And another horizontal beam lies on it.
(17)	*O varuvaru repaa obete maa toon nae.*	And then the rafter lies on top of it (the horizonal beam).
(18)	*Eve o naono to kahi ato ni nana bono hum inu vaa gina.*	It is the pole that holds the upper part of the house.
(19)	***Gaasu***	**King post**
(20)	*O gaasuu o naono to vavaasun riori tobina inu toon no paee.*	The kingpost is the pole that they stand in the middle of the house on top of the tie beam.
(21)	*Beo tovihi? Na tei koana tea bebeahu na inu.*	How many? That just depends on the length of the house.

(22) *Evehee a kiu tea maa naono bari mene dee* The function of these poles is to carry (the main ridge pole)

(23) *ge eve to vaatoka maa riori bono peho paee.* or, (in other words,) it is the one on which they make the main ridge pole perch.

(24) *Amaa ta naono bari mee amaa ta kakato koa.* These poles (lit. 'pieces of wood') are also quite short.

(25) ***Varuvaru*** **Rafter**

(26) *A varuvaru eve a naono to kahi vaobete mau ori toon no paee vai* The rafters are the beams that are laid on the main ridgepole (lit. 'horizontal beam')

(27) *to paa vaobete vori toon na mata gaasuu.* that is laid on the kingposts.

(28) *Eve mee a naono to kahi vaave taono riori bona atovo.* They are also the beams on which the sago palm thatches will be fixed.

(29) *A bero nae mee na tei habana koana tea bebeahu na inu.* Their number depends again only on the length of the house.

(30) *A naono nae a vahavahara naono vaa tea apao.* The trees used for them are little trees from the old garden.

(31) *A varuvaru he toro tapaku tea buaku a papana tea papa matau ae papa keruka,* The rafters must be made on the two sides, on the right side and the left side,

(32) *ore paa vatasu vatatana tobina toon no paee vai* so that they touch each other in the middle (of the roof) on top of the main ridgepole

(33) *to paa vaatoka vori toon na maa gaasuu vaa tobina.* that they have placed on the kingposts in the middle.

(34) ***Vaatetekoio*** **Upper ridgepole**

(35) *O naono bebeahu to kahi vaatoka vaha maa riori toon na maa varuvaru vai to paa vatasu vatatana vuru.* A long beam that will be placed on top of the rafters that touch each other (on the lower ridgepole).

(36) *Eve to kahi ato vakikis habana nana tea inu.* It will also hold the house firmly together.

(37)	*Evehee a kiu teo naono bona rakaha, ei meno kovuaka.*	But the main function of this beam, this is for the top thatch sheet.
(38)	*Eve to kahi vaobete maa riori bono kovuaka ore paa obete vamataa koa maa teebona.*	It is the beam where they put the top thatch sheet so that it properly lies there.
(39)	***Hogo***	**Floor joist**
(40)	*O naono to hogo vaha ni maa riori paana, be obete bata maana toon na maa paee vai tea maa toon.*	The beams that they put underneath (the floor), while they lie on the horizontal beams (that lie) on the posts.
(41)	*Eve to kahi obete mau o paranda.*	They are (the ones) on which the floor will lie.
(42)	*O tovihi? Na tei pete koana tea bebeahu ae tea tatabonata na inu.*	How many? That also just depends on the length and the width of the house.
